

Bellingham Ground Mount & Landfill Site

OPERATIONS & MAINTENANCE

Industria Engineering's Solar Operations & Maintenance team has over 100 years of combined experience designing, building, operating, & maintaining solar projects.

Our dedicated Solar Operations & Maintenance service team provides optimal response times and are exclusively focused on the operation, maintenance, & performance of utility and commercial solar facilities. Our highly-skilled solar technicians and monitoring analysts work together to ensure everything stays up and running smoothly. We also ensure that all safety practices are performed during any site work.

Whitinsville Carport

ABOUT US

Industria's principals have provided Engineering, Procurement, and Construction services in developing photovoltaic (PV) solar energy generation facilities in Massachusetts since 2008. We have managed, constructed, and/or designed over 200 megawatts (MW) of solar facilities.

With over 100 years of combined experience in the energy sector, the principals of Industria joined together in 2016 to focus on energy services including project management, engineering, construction, construction management, and operations & maintenance.

SERVICES PROVIDED

OPERATIONS

Industria supplies 24/7 remote support & monitoring to ensure that system up-time and energy production is optimized for each system.

EQUIPMENT MAINTENANCE

Industria provides preventative maintenance on all electrical & communication equipment on site.

Industria also offers end of life equipment change with engineering design based on the array.

ARRAY MAINTENANCE

Industria provides quarterly, bi-annual, and/or annual site visits which will include perimeter, array, and all equipment inspections with service reports delivered within 120 hrs. of the site inspection.

RESPONSE TIMES

Industria supplies high-rate response times for all issues that arise on sites with service reports from all site visits.

OUT OF SCOPE REPAIRS

Industria is equipped and skilled in the replacement & repair of any electrical equipment or electrical issues onsite. Our Team has extensive experience and training in all central & string inverters.

LANDSCAPING

Industria provides site landscaping needs including keeping the array vegetation under 6" year-round, full perimeter cleanups, and plantings.

PROJECTS

Industria maintains 45 solar projects in the New England area totaling 75MW of DC. These sites range from Rooftop Arrays, Carport Arrays, Ground Mount Arrays, Ballast Landfills, Tracking Systems, Grid Tied Energy Storage, and Grid Tied Mobile Energy Storage.

O&M TEAM

Industria Engineering's O&M Team works together on every project to help diagnose any issues and to find the best corrective measures. The O&M Team has the internal and external resources to handle any operation and maintenance issue that could arise on any particular site.

FULL-SERVICE O&M TEAM

ADDITIONAL RESOURCES

- Low Voltage Electrical
- Medium Voltage Electrical
- Communications
- Landscaping
- Environmental Hazards
